EARTHQUAKE HAZARDS AND THE DESIGN OF CONSTRUCTED FACILITIES IN THE EASTERN UNITED STATES[a]

Editors

KLAUS H. JACOB AND CARL J. TURKSTRA

CONTENTS

Preface. *By* KLAUS H. JACOB and CARL J. TURKSTRA xi

Opening Remarks. *By* ROBERT L. KETTER xiii

Keynote Addresses

Earth-Science Issues of Seismic Hazards Assessment in Eastern North America. *By* P. W. BASHAM 1

Engineering Issues of Earthquake Hazard Mitigation in Eastern North America. *By* ROBERT V. WHITMAN 11

Part I. Seismicity and Tectonics

Low-Displacement Seismogenic Faults and Nonstationary Seismicity in the Eastern United States. *By* LEONARDO SEEBER AND JOHN G. ARMBRUSTER 21

Seismicity and Seismotectonics of Southeastern Canada. *By* JOHN ADAMS 40

In Situ Stress, Crustal Strain, and Seismic Hazard Assessment in Eastern North America. *By* MARK D. ZOBACK AND MARY LOU ZOBACK 54

General Discussion: Part I 66

Luncheon Address

Earthquake Hazards: A Political Perspective. *By* EDWARD J. WOODHOUSE 72

[a] This volume is the result of a conference entitled Earthquake Hazards and the Design of Constructed Facilities in the Eastern United States, which was held on February 24–26, 1988 in New York, New York and was sponsored by the New York Academy of Sciences and the National Center for Earthquake Engineering Research.

Part II. Seismic Ground Motions

Quantitative Ground-Motion Estimates. *By* DAVID M. BOORE 81

Implications of Some Important Strong-Motion Recordings of Mid-Plate Earthquakes. *By* DIETER H. WEICHERT 95

Earthquake Source and Ground-Motion Characteristics in Eastern North America. *By* PAUL SOMERVILLE 105

General Discussion: Part II 125

Part III. Probabilistic Seismic Hazards Assessment

Implications of Eastern Ground-Motion Characteristics for Seismic Hazard Assessment in Eastern North America. *By* GAIL M. ATKINSON 128

Issues in Strong Ground-Motion Estimation in Eastern North America. *By* ROBIN K. MCGUIRE AND GABRIEL R. TORO 136

Combination of Seismic-Source and Historic Estimates of Earthquake Hazard. *By* DANIELE VENEZIANO AND LUC CHOUINARD 148

General Discussion: Part III 162

Summary Panel Discussion I 165

Part IV. Soil Liquefaction: Principles and Examples from Earthquakes in the Eastern United States

Some Basic Aspects of Soil Liquefaction during Earthquakes. *By* RICARDO DOBRY 172

Liquefaction Evidence for Repeated Holocene Earthquakes in the Coastal Region of South Carolina. *By* S. F. OBERMEIER, R. E. WEEMS, R. B. JACOBSON, AND G. S. GOHN 183

Earthquake-Induced Liquefaction in the Northeastern United States: Historical Effects and Geological Constraints. *By* MARTITIA P. TUTTLE AND LEONARDO SEEBER 196

Extent and Character of Soil Liquefaction during the 1811–12 New Madrid Earthquakes. *By* STEVEN G. WESNOUSKY, EUGENE S. SCHWEIG, AND SILVIO K. PEZZOPANE 208

General Discussion: Part IV 217

Part V. Theoretical Basis for Earthquake Engineering Design in Regions with Moderate Seismic Hazards

Current Design Spectra: Background and Limitations. *By* W. J. HALL AND S. L. MCCABE 222

An Assessment of Uncertainties in Seismic Response. *By* M. SHINOZUKA AND K. MORIYAMA 234

Lessons Learned from Recent Moderate Earthquakes. *By* FRANK E. McCLURE 251

General Discussion: Part V 259

Part VI. Seismic Design of Buildings and Special Structures, and Nonstructural Components in Moderate Seismic Zones

Wind versus Seismic Design. *By* GUY J. P. NORDENSON 262

Concrete Structures. *By* JACK P. MOEHLE 275

Seismic Design of Masonry. *By* V. C. FENTON 288

A Review of Current Practices for Seismic Design of Building Cladding. *By* GLENN R. BELL AND THOMAS A. SCHWARTZ 300

Earthquake-Resistant Bridge Design. *By* JAMES H. GATES 315

Seismic Design Considerations for Buried Pipelines. *By* T. D. O'ROURKE 324

General Discussion: Part VI 347

Summary Panel Discussion II 348

Part VII. Seismic Rehabilitation of Structures

Damage Prediction for Existing Buildings. *By* CHRISTOPHER ROJAHN 361

Seismic Rehabilitation Techniques for Buildings. *By* CHRIS D. POLAND 378

Costs and Benefits of Seismic Rehabilitation. *By* M. ELISABETH PATÉ-CORNELL 392

General Discussion: Part VII 405

Part VIII. Public Policy—Urban Design Standards

Experience with Changes in Design Requirements in the Boston Area. *By* RENÉ W. LUFT 408

Seismic Building Code Efforts in the Central United States. *By* WARNER HOWE 421

Estimation of Earthquake Losses for a Large Eastern Urban Center: Scenario Events for New York City. *By* CHARLES SCAWTHORN AND STEPHEN K. HARRIS 435

General Discussion: Part VIII 452

Closing Remarks. *By* KLAUS H. JACOB AND CARL J. TURKSTRA 454
